26GHz Radar Level Meter

1. Product Overview

This series of radar level meter adopted 26G high frequency radar sensor, the maximum measurement range can reach up to 80 meters. Antenna is optimized further processing, the new fast microprocessors have higher speed and efficiency can be done signal analysis, the instrumentation can be used for reactor, solid silo and very complex measurement environment.

• Principle

Radar level transmitter antenna microwave pulse is narrow, the downward transmission antenna. Microwave exposure to the medium surface is reflected back again by the antenna system receives, sends the signal to the electronic circuit automatically converted into level signals (because the microwave propagation speed, electromagnetic wave to reach the target and the reflected back to the receiver this time is almost instantaneous).

Datum measurement: Screw thread bottom or the sealing surface of the flange. **Note:** Make sure the radar level meter the highest level cannot enter the measuring blind area (Figure D shown below).

• The characteristics of 26G radar level meter:

- Small antenna size, easy to install; Non-contact radar, no wear, no pollution.
- Almost no corrosion, bubble effect; almost not affected by water vapor in the atmosphere, the temperature and pressure changes.
- > Serious dust environment on the high level meter work has little effect.
- > A shorter wavelength, the reflection of solid surface inclination is better.
- > Beam angle is small, the energy is concentrated, can enhance the ability of echo

and to avoid interference.

- > The measuring range is smaller, for a measurement will yield good results.
- > High signal-to-noise ratio, the level fluctuation state can obtain better performance.
- > High frequency, measurement of solid and low dielectric constant of the best choice.

2. Product Introduction

LVRH800

Application: Solid material, Strong dust, easy to crystallize, condensation occasion Measuring Range: 80 meters Process Connection: Thread, Universal Flange Process Temperature: -40°C~130°C (Standard type) -40°C~230°C (High temperature type) Process Pressure: -0.1 ~ 0.3 MPa Measurement Accuracy: ± 15mm Protection Grade: IP67 Frequency Range: 26GHz Display: LED, Programmable Supply: 2-wire (DC24V) / 4-wire (DC24V /AC220V) Signal Output: 4... 20mA / HART (2-wire / 4-wire) RS485/ Modbus

Outer Covering: Aluminum / Plastic / Stainless steel

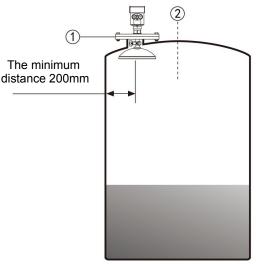

3. The Installation Requirements

• Installation guide:

The instrument is preferably installed at 1/4 or 1/6 of the diameter of the tank.

- Note: The minimum distance from the tank wall should be 200mm.
- Note: ① datum

2 The container center or axis of symmetry

• The top conical tank level, can be installed at the top of the tank is intermediate, can guarantee the measurement to the conical bottom.

 A feed antenna to the vertical alignment surface.
 If the surface is rough, stack angle must be used to adjust the angle of universal flange of the antenna to the alignment surface.

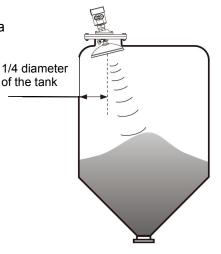

(Due to the solid surface tilt will cause the echo attenuation, even Loss of signal.)

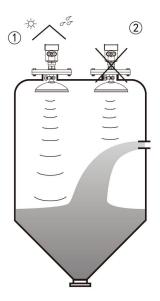

• Typical installation errors:

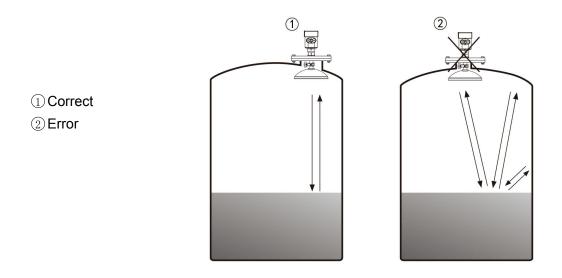

Conical tank cannot be installed above the feed port.
 Note: outdoor installation should adopt sunshade.

- ① Correct
- ② Error rainproof measures
- The instrument cannot be installed in the arched or domed roof intermediate. In addition to produce indirect echo is also affected by the echoes. Multiple echo can be larger than the real value of signal echo, because through the top can concentrate multiple echo. So cannot be installed in a central location.

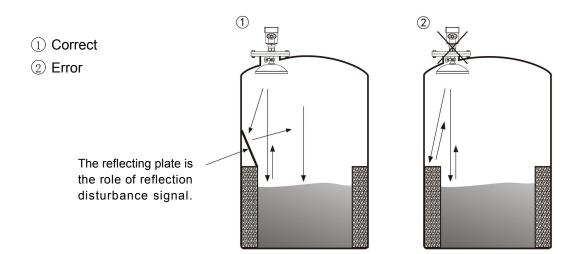

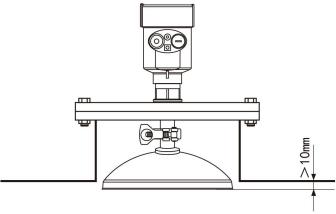

> There are obstacles affecting measurement needed reflection plate.

• Height of nozzle:

Antenna extends into the tank at least 10mm distance.

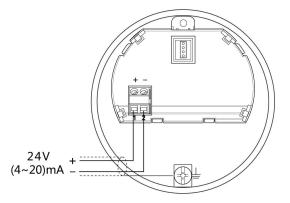

4. The Electrical Connection

• The power supply voltage:

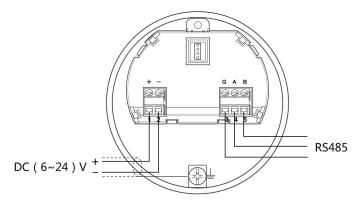

(4~20)mA/HART (Two wire system)	The power supply and the output current signal sharing a two core shield cable. The supply voltage range see technical data. For intrinsically safe type must be a safety barrier between the power supply and the instrument.
(4~20)mA/HART(Four wire system)	Separate power supply and the current signal, respectively using a two-core shielded cable. The supply voltage range see technical data.
RS485 / Modbus	Power supply and Modbus signal line separated respectively using a two-core shielded cable, the power supply voltage range see technical data.

• Connection mode:

> 24V two wire wiring diagram as follows:

➢ 6~24V RS485/Modbus wiring diagram as follows:

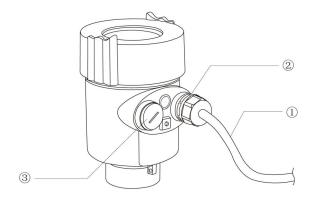

• Safety instructions:

- > Please observe the local electrical code requirements!
- Please comply with local requirements for personnel health and safety regulations.
 All electrical components of instrument operation must be completed by the formal training of professionals.
- Please check the instrument nameplate to provide product specifications meet your requirements. Please make sure that the power supply voltage and instrument nameplate on the requirements.

• Protection grade:

:

This instrument meets the protection class IP66/67 requirements, please ensure the waterproof cable sealing head. The following diagram:

How to install to meet the requirements of IP67:

Please make sure that the sealing head is not damaged.
Please make sure that the cable is not damaged.
Please make sure that the cable for use with electrical connection specification.
Cable into the electrical interface before its curved downward, ensure that the water will not flow into the shell, see the①
Tighten the cable seal head, see the②

Please electrical interface will not use blind plug tight, see the ③

5. Instrument Commissioning

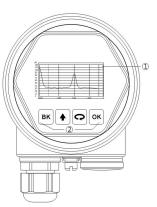

- There are three kinds of debugging method:
 - 1) Display / Keyboard

- 2) Host debugging
- 3) HART handheld programmer

• Display / Keyboard:

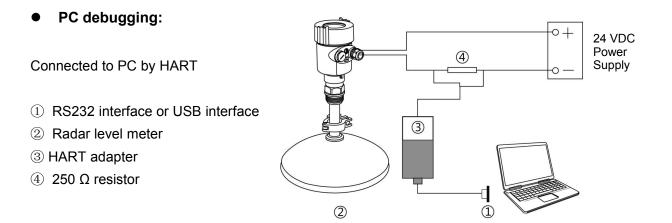

Please debug the instrumentation by four buttons on the display screen. There are three debug menu languages optional. After debugging is generally used only for display, through the glass window can read measured value very clearly.

Display / Keyboard

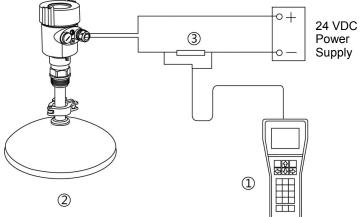

① Liquid crystal display(LCD)

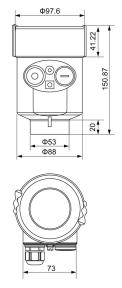

2 The key

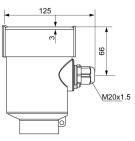

- HART handheld programmer:
- (1) HART handheld programmer
- 2 Radar level meter
- 3 250 Ω resistor

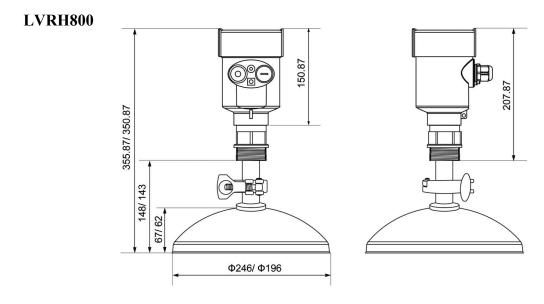

- 6. Structure Size (Unit: mm)
- The outer shell:

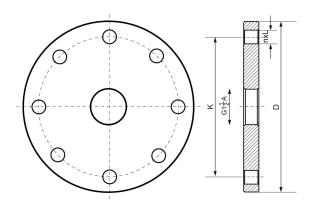

• Appearance size:

• Flange type:

Flange Selection Tables				
Specification	cification Outer diameter D Hole center		Number of Holes n	Hole diameter
DN50	Φ165	Ф125 4		18
DN80	Φ200	Ф160	8	18
DN100	Φ220	Φ180	8	18
DN125	Φ250	Φ210	8	18

7. Technical Parameters

Process Connection					
	Thread G1½″ A				
	Thread 1 ¹ / ₂ " NPT				
	Flange				
Antenna Material	Stainless Steel				
	Stalliess Steel				
The outer shell					
The seal between the she	ell and the shell cover	Silicone rubber			
Casing window		Polycarbonate			
The ground terminal		Stainless steel			
The power supply volta	ge				
Two wire system					
	The standard type	(16 ~ 26) V DC			
	Intrinsically safe	(21.6 ~ 26.4) V DC			
	Power dissipation	max 22.5mA / 1W			
	Allowable ripple				
	- <100Hz	Uss <iv< td=""></iv<>			
	- (100 \sim 100K) Hz	Uss <i0mv< td=""></i0mv<>			
Flameproof					
	(22.8 ~ 26.4) V DC 2	-			
	(198 ~242)V AC 4-wire system / 110V AC 4-wire system				
The cable parameters					
Cable entrance / plug	1 M20xI.5 cable entrance				
	1 blind plug				
Terminal	Conductor cross section 2.5mm ²				
Output parameters					
The output signal	(4 ~ 20) mA / RS485				
Communication protocol	HART				

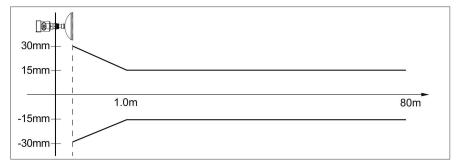

Resolution	1.6 µ A		
Fault signal	Constant current output;		
	20. 5mA		
	22mA		
	3.9mA		
The integral time	(0 ~ 36) s, adjustable		

Blind area		the ends of the antenna		
The maximum distance measurement 80 meters				
Microwave frequency 26GHz				
Communication interface		HART communication protocol		
The measureme	ent interval	about 1 second (depending on the parameter settings)		
Adjust the time		about 1 second (depending on the parameter settings)		
Display resolution 1 mm				
Working storage	Working storage and transportation temperature $(-40 \sim 80)$ °C			
Process temperature (the temperature of the antenna part)				
-40℃~130℃(Standard type) /-40℃~230℃(High temperature type)				
Pressure	Max.4MPa	a		
Seismic	Seismic Mechanical vibration I0m/s², (10 ~ 150) Hz			

8. Meter Linearity

LVRH800

Emission angle	Depending on the size of the antenna		
-⊄196mm	4°		
-⊄242mm	4°		
Precision	See chart		

9. Product Model Selection

LVRH800

Process Connection / Material

- G Thread G11/2"A / Stainless Steel 304
- N Thread 11/2" NPT / Stainless Steel 304
- B Flange DN80 / Stainless Steel 304
- C Flange DN100 / Stainless Steel 304
- D Flange DN125 / Stainless Steel 304
- E Flange DN150 / Stainless Steel 304
- F Flange DN200 / Stainless Steel 304
- H Flange DN250 / Stainless Steel 304
- M Flange DN80 / Universal joint
- K Flange DN100 / Universal joint
- T Flange DN125 / Universal joint
- Z Flange DN150 / Universal joint
- W Flange DN200 / Universal joint
- V Flange DN250 / Universal joint
- Y Special Custom

Antenna Type / Material

- A Parabolic antenna Ø196mm / Stainless Steel 316L
- B Parabolic antenna Φ242mm / Stainless Steel 316L

Seal Up / Process Temperature

- V Viton / (-40~130) ℃
- K Kalrez / (-40~230) °C

The Electronic Unit

- 3 (4~20) mA / 24V DC / HART two wire system
- 4 (4~20) mA / 220V AC / HART four wire system
- 5 RS485 / Modbus / 6~24V/ Four wire system

Outer Covering / Protection Grade

- L Aluminum / Single chamber / IP67
- H Aluminum / Double chamber / IP67
- G Plastic / Single chamber / IP65
- K Stainless steel / Single chamber / IP67

Cable Line

- M M 20x1.5
- N ½" NPT
