# ROTAMETERS WITH PTFE VALVES <br> For Select Corrosive or Ultra-Pure Media 

## FL-3000/3100 Series

```
Excellent Chemical Compatibility for Use with Corrosive or Ultra-Pure Fluids
\(\checkmark\) High Accuracy: Up to \(\pm 2 \%\) FS
```

## - Shield Magnifies Scale

``` for Accurate Readings
```

The FL-3000 and FL-3100 Series flow meters are designed for applications involving corrosive or ultra-pure fluids. The meters are equipped with built-in PTFE needle valves with Kel-F, borosilicate glass, sapphire, and Perflurorodastomer O-rings.
The special scale design, in which a vertical line runs up the length of the scale and intersects the horizontal scale divisions, reduces parallax and eye fatigue, thereby ensuring highly accurate readings. The front polycarbonate shield also acts as a magnifying glass.
