

POSITIVE DISPLACEMENT FLOW METER FOR SOLVENTS

TRODEKS®

FPD3300 Series

- ✓ Aluminum Body
- ✓ FEP Seals
- ✓ Stainless Steel Rotors
- ✓ Temperatures up to 80°C (176°F)
- ✓ NPT or BSP Threads
- ✓ DIN, JIS or ANSI Connection (Available on 1" and Larger Sizes)

The FPD3300 Series positive displacement flow meters are affordable and accurate. One primary feature is the ability to maintain consistent accuracy despite changing viscosity conditions. The meter's solid construction and excellent dynamic response are well suited to the measurement of many solvents as well as other non-abrasive lubricating fluids. Since there is no need for straight run piping upstream or downstream of the flow meter, the FPD3300 flow meters are simple to use and to install. The meter has good resolution and high accuracy at low flow rates.
