

SHORT-STROKE LINEAR POTENTIOMETERS FOR DISPLACEMENT MEASUREMENT

**25 to 150 mm
(1 to 6") Ranges**

LP802 Series

- ✓ **Rugged Construction and Shaft Seals for Protection in Factory Environments**
- ✓ **Precious-Metal Wipers Ensure High Performance and Low Noise**
- ✓ **Plastic Film Element Reduces Wear for Extremely Long Life**

The TRODEX® LP802 Series linear potentiometers measure linear position or displacement up to 150 mm (6") in a wide variety of manufacturing and process applications. With their long life, front and rear bearings, anodized extruded aluminum housings, stainless steel shafts, and precious-metal wipers and contacts, these devices are suitable for harsh factory environments. Based on a conductive plastic film element, the LP802 provides high resolution and absolute position measurement without using external signal conditioners.
